## Workers demand P65-P75 wage hike

MANILA (AP) — The union for the Philippine Air Force (PAF) has demanded a 10 percent wage hike for its members, saying that the government's proposed 5 percent increase is not enough to cover the rising cost of living.

The PAF union, which represents about 10,000 members, said it wants the government to raise the minimum wage for its employees to P65 per month from the current P60. The union also wants the government to raise the maximum wage for its employees to P75 per month from the current P70.

The union said that the government's proposed 5 percent increase is not enough to cover the rising cost of living. It said that the cost of living has increased by 10 percent in the last year, and that the government's proposed increase is only 5 percent.

The union also said that it wants the government to raise the minimum wage for its employees to P65 per month from the current P60. The union also wants the government to raise the maximum wage for its employees to P75 per month from the current P70.

Einige Autoren, wie der russische Chemiker und Nobelpreisträger Dmitri Mendeleev, haben die Periodizität der Elemente in der Natur beobachtet. Mendeleev hat die Elemente in der Natur in eine Tabelle angeordnet, die die Periodizität der Elemente zeigt. Diese Tabelle ist die Grundlage für die moderne Chemie.

As the testing method is available in the 12-point test, it is not clear whether the English test is more appropriate than the other two tests. Further studies are then needed on this issue.

Since the 1980s, various national development agencies have been working with NGOs to build a sustainable private sector. In general, the idea is to assist the private sector to become self-sufficient by providing technical assistance, training, and other support. The World Bank, for example, has been working with the private sector in many countries, including India, to help them become more competitive and self-sufficient.

The 10 provinces used in 1995 are listed in Table 1. The country still is suffering from severe economic problems, but political stability has been achieved, and the country is recovering from a decade of civil war.

# RP bars Japan cult members

**MANILA**—The Japanese cult group Aum Shinrikyo has been barred from operating in the Philippines, according to a decision by the Department of Justice.

The decision, which was issued last week, came after a series of court battles between the government and the cult, which was founded by Shoko Asahara.

Asahara, who was arrested in 1995, was charged with the 1995 Tokyo subway sarin gas attack, which killed six people and injured thousands.

Although the group has not been officially banned in the Philippines, the decision by the DOJ is a significant step towards preventing the group from operating in the country.

Asahara, who was arrested in 1995, was charged with the 1995 Tokyo subway sarin gas attack, which killed six people and injured thousands.

# Journalists vow to care for their own

**BY JIMMY C. SORIANO** *Business Development Editor*

Journalists are not just the ones who report on the news. They are also the ones who care for their own.

The Philippine Press and Information Commission (PPIC) has been set up to protect the rights of journalists and to ensure that they are treated fairly. The PPIC is a government agency that is responsible for the regulation of the media. It was created in 1992 and is now the main body that oversees the media in the Philippines.

The PPIC has been set up to protect the rights of journalists and to ensure that they are treated fairly. It is a government agency that is responsible for the regulation of the media. It was created in 1992 and is now the main body that oversees the media in the Philippines.

Does your Air Conditioner give you Clean, Cool, Quality Air?

## 3-STEP FUMIGATION SYSTEM

1. **STEP 1: FUMIGATION**  
This step involves the use of a fumigant to kill any insects that may be present in the air.

2. **STEP 2: FILTRATION**  
This step involves the use of a filter to remove any dust or debris that may be present in the air.

3. **STEP 3: DISINFECTION**  
This step involves the use of a disinfectant to kill any bacteria or viruses that may be present in the air.

4. **STEP 4: DEODORIZATION**  
This step involves the use of a deodorant to remove any odors that may be present in the air.

5. **STEP 5: AIR PURIFICATION**  
This step involves the use of an air purifier to clean the air and make it safe to breathe.

6. **STEP 6: AIR CIRCULATION**  
This step involves the use of a fan to circulate the air throughout the room.

7. **STEP 7: AIR MONITORING**  
This step involves the use of a monitor to check the air quality and make sure it is safe to breathe.

8. **STEP 8: AIR RECORDING**  
This step involves the use of a recorder to keep a record of the air quality and make sure it is safe to breathe.

**UNI-AIR Air Purifier**

UNI-AIR Air Purifier is a powerful air purifier that can remove any dust, dirt, or debris from the air. It is also capable of removing any odors or smells from the air. UNI-AIR Air Purifier is a great way to keep your air clean and fresh.

**UNI-AIR**

**STOP  
BAD  
BREATH  
NOW!**

There are many reasons why you might have bad breath. It could be due to poor oral hygiene, a diet that is high in sugar, or a medical condition. Whatever the cause, bad breath can be embarrassing. But there is a solution. UNI-AIR Air Purifier can help you get rid of bad breath by removing any odors or smells from the air.

**Dr. Alan R. Hill**  
**Medical Staff Liaison**

Figure 1 is a line graph showing the percentage of total protein in the supernatant versus the percentage of total protein in the pellet for various proteins. The y-axis is labeled 'PERCENTAGE OF TOTAL PROTEIN IN SUPERNATANT' and ranges from 0 to 100. The x-axis is labeled 'PERCENTAGE OF TOTAL PROTEIN IN PELLET' and ranges from 0 to 100. The legend indicates: (●) IgG, (○) IgM, (□) IgA, (△) IgD, (▽) IgE, (◇) IgG2a, (◇) IgG2b, (◇) IgG1, (◇) IgA1, (◇) IgA2, (◇) IgM1, (◇) IgM2, (◇) IgD1, (◇) IgD2, (◇) IgE1, (◇) IgE2. The graph shows that IgG, IgM, and IgA are primarily in the supernatant, while IgD and IgE are primarily in the pellet. The IgG2a, IgG2b, IgG1, IgA1, IgA2, IgM1, IgM2, IgD1, IgD2, IgE1, and IgE2 are primarily in the pellet.

NO ONE MAY KNOW  
THE FACTS ABOUT THE CASE OF  
TSUNASHI VS. NENAGO NAVIGATION

FACT IS THE RESPONSIBILITY FOR  
PUBLIC CONDUCT MUST REST WITH THE  
OFFICIALS, NOT WITH THE CREDITORS

Sumitomo Heavy Industries should not be  
hailed by any government, owned by  
NENAGO. In the new business public  
fact, is a shareholder seeking to collect  
the money owed to it.

In the other hand as a holder of a  
certificate of public convenience  
NENAGO is solely responsible for  
managing its finance and operating  
affairs, thereby ensuring uninterrupted  
and safe service to the public.  
As a public utility it should assume the  
responsibility instead of passing the  
burden to its creditors and suppliers.  
The creditors have already extended  
financing pursuant to NEFA. The law  
enacted NENAGO is not responsible  
for its debts. NENAGO has a duty to pay  
its debt.

## IN SUMMARY

THICI has extended full cooperation to  
NENAGO by providing ship repair  
services and extended credit terms.

THICI has every right to be paid.

The Management

Tsunashiki Heavy Industries, Ltd. Inc.

THICI SLP

# Get a beauty makeover from a good workout

Hold the bar across your thighs for the wide squat.

anyone who's ever done a "squat" knows how hard it is. But for those who want to get a better workout, there's a new exercise called the "wide squat." It's a variation on the traditional squat, but it's much more challenging. The wide squat is done with the feet wide apart, and the barbell is held across the thighs. This exercise works the legs, hips, and core muscles, and it's a great way to burn calories.

## Swapping exercises

For the wide squat, hold the barbell across your thighs and squat down as far as you can.

Wide squats are a great way to burn calories and build muscle. They are a variation on the traditional squat, but they are much more challenging. The wide squat is done with the feet wide apart, and the barbell is held across the thighs. This exercise works the legs, hips, and core muscles, and it's a great way to burn calories.

## New alternatives to costly badminton racquets

The **EXAMINATION** given is divided in the following way: each student has to answer 10 questions of a computerized evaluation sheet.

In a similar fashion, the authors also suggest that the use of a single, one-dimensional measure, such as the 10-item quality-of-life survey, might be insufficient to capture the complexity of the experience of the patient. The authors suggest that a more comprehensive measure, such as the SF-36, might be more appropriate.

**2.4** *Long-Term Impacts*—The long-term impacts of the proposed project on the environment are expected to be minimal. The project is located in an area that is primarily agricultural and has a low population density. The project is expected to have a minimal impact on the environment, and the impacts are expected to be reversible. The project is expected to have a minimal impact on the environment, and the impacts are expected to be reversible.
